Information Technology & Software | Data Entry / Administrative | Customer Support / Service | Teaching / Tutoring | Writing / Content Creation | Translation / Interpretation

Applied Computer Science – IT Systems administration student specializing in IT Support, Systems Administration, Networking, and Cybersecurity. Experienced in troubleshooting computer systems, developing web applications with Python and Django, and supporting users through effective technical solutions. Backed by a license degree in Business Management and Computer Science, as well as self-directed training in web development. Proven leadership through education, nonprofit organizations management, and community service. Seeking opportunities in IT Support, Systems Administration, Cybersecurity, and Data Analytics.

WORK EXPERIENCE

Teacher Assistant
Université Pontificale Catholique Orthodoxe (UPCO - Baraka Campus)
Feb 2026 – Present

Instruct Bac 1 Telecommunications students in IT systems troubleshooting, C programming, and algorithm development; improved student examination pass rates by approximately 30% through practical instruction and academic mentoring; and developed students' problem-solving skills through hands-on technical exercises and laboratory discussions.

Web Developer
Self-employed / Freelancer
Jun 2025 – Present

Designed and deployed multilingual websites incorporating e-commerce and educational functionality; successfully delivered more than three client projects while maintaining project scope and requirements; utilized Python, Django, JavaScript, HTML, CSS, and database technologies to develop secure and scalable web solution; developed a live-streaming platform for Radio AMANI FM, increasing online audience reach by approximately 300%.

Computer Repairer Technician
Self-employed
Jan 2025 – Present

Diagnosed and repaired more than 50 desktop and laptop systems, addressing hardware and software issues; achieved approximately 93% customer satisfaction through effective troubleshooting and support services resolving Operating System, driver, and application failures, and improving device performance and reliability.

Sunday School President - Volunteer
LDS - local branch (Baraka, South - Kivu, DRC)
Nov 2024 – Present

Organizing weekly programs for the Family Home evenings, coordinating home visits, and providing pastoral support that strengthens community solidarity and fosters values of compassion and mutual respect.

Executive Secretary - Volunteer

NGO T. H Foundation

Dec 2023 – Present

Coordinate organizational governance, project planning, and operational activities; managed a 5,000,000 CDF microcredit program supporting 100 women entrepreneurs in South Kivu; oversaw fund allocation and accountability processes, empowering beneficiaries to establish sustainable small businesses; strengthened project management, leadership, and community development skills through large-scale program administration.

Secondary School Teacher

Uhuru Secondary School

Apr 2021 – Feb 2024

As a teacher assigned at the form four level, three times (years) I successfully supervised and mentored final-year secondary students, leading them to pass the DR Congo National Exam in 2022, 2023, and 2024.

KEYS PROJECTS

- Radio AMANI FM Streaming Platform: Designed and implemented an online live-streaming platform enabling 24/7 broadcasting, and increased potential audience reach by approximately 300%.
- Educational Learning Platform: Developed web application with multilingual support, e-payment functionality and educational functionality using Django and Python.
- Computer Systems Support: Diagnosed and repaired 50+ systems with a 93% customer satisfaction rate.
